

Kajigamori climbing

Our school has an event where we go climbing in June every year.

When I joined this event two years ago, I was moved.

In this event, we do something with all of the students.

First, we climbed a mountain called kajigamori. It's height is about 1400 meters. So, it's really hard to finish climbing. But the sight that we can see from top of a mountain is very beautiful and pleasant.

Second, we have outdoor cooking. Our group ate curry, yakitori, and some candy. We spent a long time to make curry so it was very delicious. If it was sunny, we could make a campfire and see the beautiful starry sky. But when I joined this event, it was cloudy so we went back to our school after eating lunch. I wanted to stay overnight in Kajigamori. But this event was very good.

Kajigamori climbing is special event only Kahoku junior high school. I love this event.

Kajigamori tozan

I want to introduce Kajigamori climbing. We go to Kajigamori with all the students. Kajigamori is 1400m high.

There are two patterns to climb. First, we go up a thousand steps. It is hard, but we can take a shortcut. Second, we climb normal road. It takes a longtime.

Active boys and girls choose the way of A thousand steps.

We eat lunch at the top of the mountain. Students help to make canny each other.

However, we didn't go there this year, because of the heavy rain.
