Special school classes

The independence class

Students try various things to grow for themselves in this class. For example, they challenge themselves with exercising, cooking, talking to improve communication skills and other challenges suitable to the students. They can find and enhance the skills they need.

The farming class

Students and teachers grow various kinds of vegetables and fruit. And, they sell them in the school.

About using ICT

Students sometimes take lessons using information equipment. For example, they use smartphones and PCs. They are used by students when it is hard to do note-taking and for communication. By doing this, they can concentrate on the lesson and have a good school life.

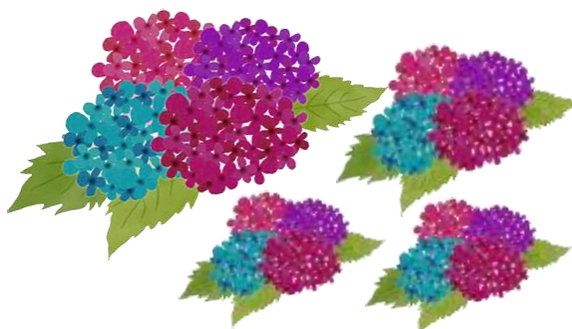

About the high school

There is a special event. In recent years, Students have been interacting with Kochi Commercial High School in summer and winter twice a year. We will interact with each other at school. At Kochi Commercial High School, we eat lunch together or receive lessons from them. At our school, we do social skill building and play Boccha. We can spend time meaningfully.

The vibe in the school

Students and teachers get along well. The mood of the school is also good, so it is comfortable for us to spend there. The teachers support what the students want to challenge for themselves and for the future.
