Hydrangea bloom in the irrigation channel in front of the school, A lot of flowers bloom in the schoolyard every season.

Established as the Hirooka College of Business in 1882, Haruno High School has played a part in agricultural education in Kochi Prefecture, with many changes over time. Through the reform of the post-war school system, the school name was changed to Kochi Prefectural Hirooka Agricultural High School in 1948, and the Kochi Prefectural Horticultural High School in 1971.

Our faculty and staff are based on the “Study by doing ~ Learning by Doing ~” school philosophy, and the students' self-reliance and autonomy are centered on the four lines of horticultural, food and agriculture, life creation, and humanities. In addition to our basic learning slogan, we will focus on experiential learning and promote educational activities with the aim of cultivating human resources rich in creativity, allow students to develop the ability to solve problems on their own, and contribute to the community.

Our faculty and staff are “Team Haruno” and will do their best to achieve the course that students want.
