

Humanities Course

○What is the Humanities Course?

Literary Linguistics Mathematics, Nature, the World, International Affairs and so on. We learn basic principles and rules; the objective is to develop the ability and attitude to gain insight into human society from a broad perspective.

While taking courses in five subjects, you can choose subjects that are tailored to your career according to your interests and appropriateness.

○Students can deepen their learning with a strong interest in ordinary subjects and can get actively involved in learning with the primary desire to go on to visit senior schools such as universities.

○Students with creativity and a spirit of challenge can find problems in the real world based on the knowledge and experience they have learned and try to solve them while making hypotheses and practicing them.
